PROFESSIONAL SUMMARY

A dynamic analytical person with a passion for renewable energy and software development, I seek a career that challenges and inspires me to improve. I have a solid command of integrated electrical systems, as well as a deep understanding of solar PV and batteries. I am initiative-taking, ambitious, fast learner, hard worker, and a team player, extremely adaptable to any environment and committed to delivering results.

Note: Valid student work permit in Poland, Open to Relocate, available for immediate employment.

SKILLS

- Proficient in Multi-language Software Development (Python, C, Assembly, MATLAB)
